

AMERICAN PSYCHOLOGICAL ASSOCIATION

Presents This Presidential Citation To

Luis Carrizo, PhD

For his leadership role in the Global Psychology Alliance (GPA), particularly in connecting the GPA to the United Nations (UN) system.

Dr. Carrizo has served as President of the *Coordinadora de Psicólogos del Uruguay* and has worked with the United Nations Educational, Scientific, and Cultural Organization (UNESCO), and used his political knowledge to help GPA understand how to get psychological science into the hands of U.N. policymakers.

Dr. Carrizo has helped train GPA members from Namibia, the Republic of Korea, and elsewhere on how to connect with U.N. staff in their countries, and has facilitated meetings with the U.N. Resident Coordinator in his own country of Uruguay. He has been a creative partner and leader in encouraging GPA's understanding of global policy and utilizing that understanding to integrate psychological science into U.N. initiatives, for example, responding to remarks from the U.N. General Assembly President on a high-profile GPA climate change webinar.

For his role connecting psychology to global policy, I am pleased to present Dr. Carrizo with this Presidential citation.
